PRODUCT OVERVIEW

- Lens
- Indicator light
- Microphone
- Light sensor
- PIR sensor

- Battery status light
- Sync button
- MicroSD card slot
(MicroSD card not included)
- USB slot
- Power button

SETTING UP THE SYSTEM

1. Download the Home V app and create an account.

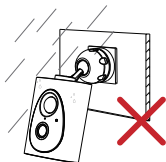

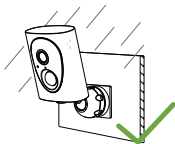

2. Switch the power button on to wake up the camera.
3. Press the Sync button for about 5 seconds until you hear a 'Du' sound with the red light flashing.
4. Go to the Home V app, then add your device by tapping on the '+' button; follow the app instruction to finish the setup process.

MOUNTING THE CAMERA

Outdoor Installation Note

For outdoor use, installation in a sheltered location is recommended. Please place the camera upward to avoid rain or snow getting into the device. Avoid installing the cameras where there are thick walls or obstructions between the cameras and the router.

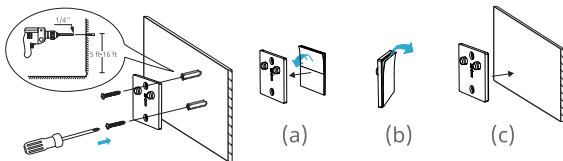

You may mount your cameras on a wall, ceiling, or counter. Follow the 4 steps below:

1. Find the base plate of the bracket from the accessory box. Then, use the plate as a template to mark points on the ceiling or wall to assist with the drilling process.

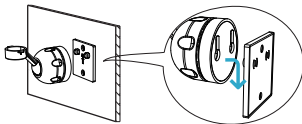

2. Then use a 1/4" drill bit to drill holes and place the round adapter plate on the surface with anchors and screws (included) as needed.

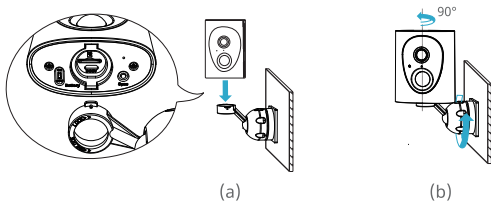

*Note: to install the camera on smooth surfaces, use the sticky adhesive pad (included) to stick the square adapter plate on the surface, then follow the other 3 steps above.

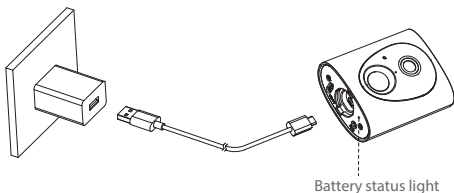

3. Locate the bracket from the accessory box and snap the bracket onto the base plate.

4. Vertically place the camera on the camera mount holder, adjust the angle of the cameras until the desired view is set. Rotate the nut to secure the camera.

CHARGING

Battery status light	Charging: Steady Red
	Fully Charged: Steady Green
Charging time	7-8 hours(0-100%)

SOLAR PANEL INSTALLATION

SolarCam Mount System

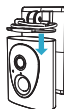

- a. Remove the camera and solar panel from the packaging. Tear off the non-adhesive layer from the bottom of the solar panel base.
- b. Rotate the base to ensure it is perpendicular to the solar panel.
- c. Affix the solar panel base to the top of the camera, applying firm pressure to ensure a secure bond.
- d. Fine-tune the angle for optimal positioning.

(a)

(b)

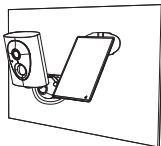

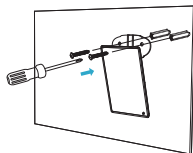

(c)

(d)

Side Solar Panel Setup

1. Use the solar panel base as a template to mark drilling points on the wall.
2. Use a 1/4-inch drill bit to create holes, then mount the base on the wall using anchors and screws provided.
3. Fine-tune the angle for optimal positioning.

CUSTOMER SERVICE

Warranty

Puwell Technology Inc. warrants this product to be free of defects in materials or workmanship for one year. This warranty does not include damage resulting from accidents or misuse. Damage from unauthorized service or modification of the product or of any furnished component will void this warranty in its entirety. This warranty is expressly in lieu of all other warranties, expressed or implied, including any warranty, representation, or condition of merchantability or that the products are fit for any particular purpose or use, and specifically in lieu of all special, indirect, incidental, or consequential damages. To obtain service/ replacement, please contact support@virtavo.com . Please allow up to seven (7) business days for your replacement to be processed.
